Art Unit: 2154

1. The current title is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed

Art Rejections:

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1, 7-9, 15-17 and 23-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Seshadri, U.S. pat. No. 6,615,201.

Seshadri discloses a prior art OSI-compliant database comprising a tree for storing data object instances and a standard protocol for retrieving/extracting the object instances using descriptive information indicating a starting position (specific object) and a scope condition (entire subtree in the database) (see col 2, line 66 - col 3, line 9).

Allowable Subject Matter:

4. Claims 2-6, 10-14 and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion:

5. The references cited by the examiner on PTO-892 but not relied upon are considered pertinent to applicant's disclosure.
